The above classes of words are unlimited in extent, and such compounds may be formed by any writer or speaker at will from almost all the adjectives or participles in the language, excepting those which have a recognized and usual negative correspondent with the prefix *in-*. No attempt will be made, therefore, to define them all in this Dictionary; many will be omitted from its Vocabulary which are negations of the simple word, and are readily explained by prefixing a *not* to the latter. Derivatives of these words in *-ly* and *-ness* will also, for the most part, be omitted for the same or similar reasons.

There will be inserted as separate articles with definitions, the following: —

1. Those which have acquired an opposing or contrary, instead of a merely negative, meaning; as, *unfriendly, ungraceful, unpalatable, unquiet,* and the like; or else an intensive sense stronger than *not* would express; as, *unending, unparalleled, undoubted,* and the like.

2. Those which have the value of independent words, because the simple words are either not used at all, or are rarely, or at least much less frequently, used; as, *unavoidable, unconscionable, undeniable, unspeakable, unprecedented, unruly,* and the like; or because they are used in a different sense from the usual meaning of the primitive, or especially in one of the significations of the latter; as, *unaccountable, unalloyed, unbelieving, unpretending, unreserved,* and the like; or because they are so frequently and familiarly used that they are hardly felt to be of negative origin; as, *uncertain, uneven,* and the like.

II. *Un-* is prefixed to nouns to express the absence of, or the contrary of, that which the noun signifies; as, *unbelief, unhealth, unrest, untruth,* and the like.

☞ The more common compounds of this last class are given in full in their proper order in the Vocabulary.

[*Obs.*] **3.** Long-continued practice; customary mode of procedure; custom; habitual use; method. **4.** Customary use or employment, as of a word or phrase in a particular sense. **5.** Experience. [*Obs.*]

Syn. — Custom; use. — A *custom* is not necessarily a *usage.* A *custom* may belong to many, or to a single individual. A *usage* properly belongs to the great body of a people. Hence, we speak of *usage*, not of *custom*, as the law of language. Again, a *custom* is merely that which has been *often* repeated, so as to have become, in a good degree, established. A *usage* must be both often repeated and of *long standing.* In law, *usage* and *custom* are often used interchangeably, but *custom* also has a restricted sense. See CUSTOM, *n.*, 3.

Us'ance (ūz'ans), *n.* [F. See USE, *v. t.*] **1.** Usage. [*Obs.*] **2.** Usury. [*Obs.*] **3.** (*Com.*) The time, fixed by usage, when a bill of exchange is payable.

Will (wĭl), *n.* [AS. *willa;* akin to G. *wille.* See WILL, *v.*] **1.** Power or faculty of the soul by which it is capable of choosing; the faculty or power of the mind by which we decide to do or not to do. **2.** The choice made; a determination or preference which results from the act or exercise of this power; volition. **3.** The choice or determination of one having authority; decree; command. **4.** Strong wish or inclination; desire; purpose. **5.** That which is strongly wished or desired. **6.** Arbitrary disposal; power to control, dispose, or determine. **7.** (*Law*) The legal declaration of a person's mind as to how he would have his property disposed of after his death; the written instrument declaring this.

At will (*Law*), at pleasure; as, an estate *at will* is one held at the will of both parties. — **To have one's will,** to obtain what is desired; to do what one pleases. — **With a will,** with willingness and zeal; earnestly; heartily.

Will (wĭl), *v. t. & auxiliary.* [*imp.* WOULD (wo͝od). Indic. present, I *will,* thou *wilt,* he *will;* we, ye, they *will.*] [OE. *willen,* imp. *wolde;* AS. *willan,* imp. *wolde;* akin to G. *wollen,* L. *velle* to wish, *volo* I wish. **1.** To wish; to desire; to incline to have. **2.** As an auxiliary, *will* is used to denote futurity dependent on the subject of the verb. Thus, in the first person, "I *will*" denotes willingness, consent, promise; and when "*will*" is emphasized, it denotes determination or fixed purpose; as, I *will* go if you wish; I *will* go at all hazards. In the second and third persons, the idea of distinct volition, wish, or purpose is faint, and simple certainty is expressed. To emphasize *will* denotes (according to the tone or context) certain futurity or fixed determination.

☞ As in *shall* (which see), the second and third persons may be virtually converted into the first, either by question or indirect statement, so as to receive the meaning which belongs to *will* in that person.

☞ *Would,* as the preterit of *will,* is chiefly employed in conditional, subjunctive, or optative senses. *Would* is used for both present and future time, in conditional propositions, and *would have* for past time. *Would not,* as also *will not,* signifies refusal.

☞ In Ireland, Scotland, and the United States, especially in the southern and western portions of the United States, *shall* and *will, should* and *would,* are often misused, as in the following examples: —

I am able to devote as much time . . . to other subjects as I *will* [shall] be under the necessity of doing. *Chalmers.*

A countryman, telling us what he had seen, remarked that if the conflagration went on, as it was doing, we *would* [should] have . . . the Old Town of Edinburgh to rebuild. *H. Miller.*

I feel assured that I *will* [shall] not have the misfortune to find conflicting views held by one so enlightened. *J. Y. Mason.*

Will, *v. i.* To be willing; to wish; to desire.

☞ This word has been confused with *will,* v. i., to choose, which, unlike this, is of the weak conjugation.

Will I, nill I, *or* **Will ye, nill ye,** *or* **Will he, nill he,** whether I, you, or he will it or not; hence, without choice; compulsorily; — sometimes corrupted into *willy nilly.*

Will, *v. t.* [*imp. & p. p.* WILLED (wĭld); *p. pr. & vb. n.* WILLING. Indic. present I *will,* thou *willeth,* he *wills;* we, ye, they *will.*] [See WILL, *n.*] **1.** To form a distinct volition of; to determine by choosing; to ordain; to decree. **2.** To enjoin or command; to order. Wit (wĭt), *v. t. & i.* [*inf.* (To) Wit; *pres. sing.* Wot, *pl.* Wite; *imp.* Wist(e); *p. p.* Wist; *p. pr. & vb. n.* Wit(t)ing.] [OE. *witen,* pres. *ich wot, wat,* I know (wot), imp. *wiste,* AS. *witan;* akin to G. *wissen,* L. *videre,* Gr. ἰδεῖν, Skr. *vid* to know. Cf. Vision, Wise, *a. & n.*, Wot.] To know; to learn; — now used only in the infin., *to wit,* esp. in legal language, to call attention to a particular thing, or to a more particular specification of what has preceded, as equivalent to *namely,* or *that is to say.*
Wit, *n.* [AS. *witt, wit.*] **1.** Mind; intellect; understanding; sense. **2.** A mental faculty or power; — chiefly in the *pl.*, and in certain phrases. **3.** Felicitous association of ideas not usually connected, so as to produce a pleasant surprise; also, the power of readily combining ideas in that way. **4.** A person of eminent sense or knowledge; a man of genius, fancy, or humor; one distinguished for bright sayings, for repartee, etc.
The five wits, the five senses; also, sometimes, the five qualities or faculties, *common wit, imagination, fantasy, estimation,* and *memory.*
Syn. — Ingenuity; humor; satire; sarcasm; irony; burlesque. — *Wit* primarily meant mind, and now denotes the power of seizing on some thought or occurrence, and, by a sudden turn, presenting it under aspects wholly new and unexpected — apparently natural and admissible, if not perfectly just, and bearing on the subject, or the parties concerned, with a laughable keenness and force. The pleasure we find in *wit* arises from the ingenuity of the turn, the sudden surprise it brings, and the patness of its application to the case, in the new and ludicrous relations thus flashed upon the view. *Humor* is a quality more congenial to the English mind than *wit.* It consists primarily in taking up the peculiarities of a *humorist* (or eccentric person) and drawing them out, so that we enjoy a hearty, good-natured laugh at the unconscious manifestation of whims and oddities. From this original sense the term has been widened to embrace other sources of kindly mirth of the same general character.

Wound (wo͞ond *or* wound), *n.* [AS. *wund;* akin to G. *wunde*, and to AS. & G. *wund* sore, wounded.] 1. A hurt or injury caused by violence; specif., a breach of the substance of any creature or living thing; a cut, stab, rent, or the like. 2. Fig.: An injury, hurt, damage, detriment, or the like, to feeling, faculty, reputation, etc.

☞ Walker condemns the pronunciation *woond* as a "capricious novelty." The use of *ou* in Old English to represent the sound of modern English *oo* was borrowed from the French, and replaced the older and Anglo-Saxon spelling with *u*. This Old English sound of *ou* regularly changed into the diphthongal sound usually written with the same letters *ou* in modern English (as in *ground, hound, round*, etc.); and the pronunciation *woond* is certainly opposed to this rule. The change of the sound of *ou* took place whether the word was taken from the French or not, provided it was old enough in English to have suffered this change; but words taken from the French at a later time, or influenced by French, may have the French sound.

Wound, *v. t.* [*imp. & p. p.* Wounded; *p. pr. & vb. n.* Wounding.] To hurt by violence; to make a wounding; hence, to hurt the feelings of; to cause injury to.

A PRONOUNCING GLOSSARY

OF

SCOTTISH WORDS AND PHRASES.

THE Scottish dialects, or Scottish language as they are called by some, are forms of the Northumbrian English, which up to the 15th century was spoken as well in Yorkshire and Northumberland as in the Scottish Lowlands. Originally the terms "Scot" and "Scottish" were applied to the Celtic people of Ireland and those of western Scotland who came from Ireland, but the language of their non-Celtic conquerors became the literary language of the land, and is now the language which is meant by "Scotch," "Scottish dialects," or "Scottish language." Scottish literature practically began in the 14th century, with the works of John Barbour, a contemporary of Chaucer, and others of his time, — whose writings are in fact Northumbrian English. By the end of the 15th century the language had under various influences, political, racial, etc., developed the general form which it retained during its chief literary period, and down to the time of the union of the kingdoms of England and Scotland in 1707. The use of Scotch as the general language of literature of the country ceased about the time of the accession of James VI. of Scotland to the English throne, although it still continued to be the common language of the people. Subsequent to that, however, there was a brilliant period of revival in ballad and lyric poetry, and still more recently the Scottish dialect has been freely used in descriptions of Scottish life and character by Scott, Galt, Macdonald, Black, Barrie, and others up to the present time. The Scottish pronunciation has changed comparatively little from what it was two centuries ago when the languages of England and of Scotland were but slightly different.

As the works of some of these authors, especially Burns among the poets, and Scott and other more recent authors among the prose writers, are extensively read in England and America, the want of a general glossary of the words and phrases used by them is often felt; and it is to meet this want that this glossary is offered to the public, in the belief that it will be deemed a useful and appropriate addition to an English dictionary.

The Scotch is not one dialect, but there are numerous dialects differing from each other, not only in pronunciation, but also in vocabulary, grammar, and spelling.

The vocabularies of the Scottish dialects vary with the different shires, according as they have felt more or less the influence of the Gaelic, French, or Scandinavian languages, and these differences are noticeable even among the dialects of Lowland Scotch, where the Scandinavian influences are less marked. The body of this glossary is the dialect of Burns, but some words peculiar to other dialects are also given because found in works familiar to English readers.

The orthography of modern Scotch is extremely arbitrary and variable; and the spelling of a word affords no reliable guide to its pronunciation. Of the two principal systems or fashions which prevail, one (seldom used except in connection with an archaic diction) employs the spelling of the writers of the 15th and 16th centuries, regardless of pronunciation. The other, and much the commoner of the two, is based upon the standard English spelling, and conforms the spelling of Scotch words to English where the sounds of the English and Scotch are near to each other; and also where the sounds are different, but the English spelling represents to a Scotchman more or less accurately the Scotch pronunciation. Where a word or form is distinctly Northern or is wanting in the English, the Scotch orthography is followed, as *streek* for *stretch*, *kirk* for *church*, *ee* for *eye*, etc.; but whatever spelling is used, the words when spoken by Scotchmen are given their Scotch sounds.

The result of this is that Lowland Scotch as written or printed is largely the same as common literary English, with some words not found in English and some peculiarities of idiom and grammatical construction, etc. Thus Burns in the poem "A Man 's a Man for a' That" uses in all 115 different words, of which only 18 words do not occur in English. Much modern Scotch literature is therefore quite intelligible to an English person reading it, which would be mostly unintelligible to him if spoken with a Scotch dialectic pronunciation.

Because of this lack of any standard of orthography for Scotch words, in works of modern writers they are frequently spelled phonetically to represent the Scotch pronunciation to the English ear, as in other dialectic story writing; but these forms have not been recognized in this glossary except in a few exceptional instances.

The difficulty to be overcome in attempting to give an English or American reader an idea of the correct pronunciation of the Scottish dialect is very great. The aim pursued has been to indicate, as fully as could be done with the English equivalents, the pronunciation (given for that purpose) of native-born Scotchmen. Among others the editor is especially indebted to Mr. Robert Lilley, M. R. A. S., one of the editors of the Century Dictionary, for many suggestions both as to pronunciation and subject-matter made on reading the galley proofs of the glossary, as well as to Mr. James Kennedy and to Mr. James Graham; and also to the monograph of Mr. James A. H. Murray (editor of the "New English Dictionary") on "The Dialect of the Southern Counties of Scotland" published in the "Transactions of the Philological Society," 1870–1872.

The consonant skeleton of the Scotch dialect is practically the same as that of the English, the only consonant used in the Lowland Scotch and not used in English being the guttural sound of *ch* in *nicht*, *bught*, etc., corresponding to the sound of *ch* in German *ich*, *doch*. The letter *r*, however, in Scotch is always pronounced as a consonant, and is strongly trilled; and *wh* and *h* are more strongly aspirated than in English. Some of the combinations of consonants in Lowland Scotch are treated differently from what they are in English; thus in *wr* and *kn* initial the *w* and *k* are audibly pronounced; while in final *mb*, *nd*, *ng*, *pt*, *kt*, the *b*, *d*, *g*, and *t* are regularly silent.

The vowel system of the Scottish (as well as the Northern English) dialects, however, is as a whole distinct from the vowel system of ordinary English speech, so that there are few, if any, vowel elements in the Scotch dialects identical with those of the English system. The two have nearly corresponding vowels; but almost every vowel of the Scotch dialect is recognized to differ either in quantity or quality from the corresponding vowel in English; and although each of these differences may be slight, yet their combined effect, as exaggerated by the peculiar Scotch intonation and syllabic accent, is to give to the Scotch dialect or language as a whole a marked individuality distinct from that of English.

In respelling the words for pronunciation in this glossary the symbols used in the body of the book are employed, those being used which indicate most accurately the sound of the Scotch word to the English ear. The confused and uncertain spelling of Scottish words, and the difference of pronunciation in different localities, makes it impossible to give any practical system of rules for the pronunciation of Scotch words in the space here available. Generally speaking, it may be noted that —

1. The letter *a* is chiefly used with sounds corresponding to those it has in English *arm*, *ask*, and *ace*, the peculiar ä of English being foreign to the Scotch dialect.

2. The letter *e* before *r* frequently has the sound of *e* in *error*, when in English it has the sound of *e* in *her*.

3. The vowel *i* is regularly pronounced so as to closely resemble the English ĕ in words where in English it would be pronounced as ĭ.

4. In Scotch the initial element of the long *i* is regularly cut shorter than in English, and the vowel is represented in the respelling by ĭ to indicate the distinction.

5. In many words which in English are pronounced with ŏ, as in *rod*, *bog*, *on*, etc., the Scotch pronunciation gives the long *o*, but cut short; and in these cases the sound is indicated by ŏ.

6. The letter *u* in many Scotch words has the sound of the French *u*, which is indicated in the respelling by u̯.

7. The diphthong *ae* regularly represents the sound of English long *a* cut short; and is indicated by ă.

8. The diphthong *ei* regularly has the value either of ē or less often ĭ; *ey* is usually equivalent to ĭ.

9. The diphthong *oi* is often nearly like English ĭ.

10. The diphthong *oo* is sometimes pronounced like French *eu* in *peur* (represented in this glossary by ĕ); and sometimes like English *oo* in *ooze*.

11. The diphthong *ou* is regularly equivalent to English *oo* in *ooze*.

12. The diphthong *ow* has both the value of *oo* in English *ooze*, and also that of *ou* in English *house*.

13. The diphthong *ui* as in *guid*, *puir*, etc., is nearly the same as the French *u* in *plume*, and is indicated by u̯.

14. The letter *r* is pronounced as a distinct consonant in all cases.

15. The digraphs *ch* and *gh*, as in *aneuch* and *aught*, are harsh gutturals equivalent to the German *ch* in *ich* and *doch*, and represented by ʜ in the respelling.

16. Final *t* is dropped after the mutes *k* and *p* in such words as *direct*, *exact*, *fact*, etc.

17. The digraph *ng* in the middle of a word has the sound of *ng* in *sing*.

18. The letter *l* is usually elided after the vowel *a*, as well as before *k* and *m*; but when final or following *e* or *i* is pronounced.

19. The letter *z* in some words, such as *capercaĭlzie*, *coĭlzie*, etc., is a corruption of the old Scotch form representing liquid *l*, thus, —*ȝ*.

20. The terminations *-tious*, *-tial*, and *-cial*, are still pronounced as dissyllables.

The foregoing will serve to give a general idea of the most striking peculiarities of the Scotch pronunciation as distinguished from English, but cannot be taken as a guide for the pronunciation of all Scotch words, there being many exceptions to most of these rules, though not here noted.

VOCABULARY OF RHYMES.

INTRODUCTORY REMARKS.

§ 1. **The two most common forms of rhymes are** rhymes of monosyllables or final acccented syllables (called *single* or *male* rhymes); and rhymes of two syllables the first of which is accented (called *double* or *female* rhymes), such as *faster, pastor, fading, aiding, trouble, double*, etc.; but of these two forms much the most common is that of single, or male rhymes, which alone are given in this vocabulary.

§ 2. *Correspondence in sound and accent the test of a rhyme.* — Theoretically only those words rhyme each of which is a monosyllable, or ends in an accented syllable, or in two or more similarly accented syllables, exactly corresponding in sound with those of the other words. In a strict rhyme there is therefore exact correspondence in sound and also exact correspondence in accent. In practical usage, however, this theoretical standard of what constitutes a rhyme is not always observed, but more or less freedom is exercised in using as rhymes sounds which in careful pronunciation are distinguished from each other, or syllables the accent or stress of which is unequal.

§ 3. *Correspondence in accent.* — Strictly speaking single rhymes must consist only of monosyllables or of final syllables having a primary accent. There are, however, many words which have a primary accent on the antepenult, but in pronunciation receive a secondary, or sufficiently strong, accent or stress upon the final syllable to make it proper to use that syllable as a rhyme to another final syllable which receives a primary accent, or to use it as a rhyme to a monosyllable of the same sound; thus, *accumulate* may be used to rhyme with *date, expedite* to rhyme with *sight*, etc. In the case of some very common terminations, such as *-al, -or, -an, -ant*, etc. (see -AL, -AN, -ANT, -OR), there is a tendency in words accented on the antepenult to slight the final syllable in ordinary pronunciation so that it does not have the vowel quality which is given to it when distinctly pronounced. In these cases the words are suitable for single rhymes only when the final syllable is distinctly pronounced; and such use is to be avoided where the distinct pronunciation would sound stilted or awkward. There are some monosyllabic words, such as prepositions, articles, etc., which, although they are single words, are slurred over in speech, and do not receive an accent or stress sufficiently strong to make them suitable for use in serious verse, as rhymes with other monosyllabic words or accented syllables; and, for the same reason, the like use of an adjective at the end of a line with its substantive in the next line is usually objectionable.

§ 4. *Correspondence in sound.* — No definite line can be drawn between vowel sounds which so closely resemble each other as to make it proper to use them as rhymes with each other and those which do not. In this vocabulary some sounds which are very closely related, or are commonly confused with each other, have been treated together under the same vocabulary entrances, as well as those which for the sake of convenience are represented by different symbols. These cases are ă and ȧ (as in *hanch, lanch, band, command, rant, ant*; see Guide to Pronunciation, §§ 54, 55, and 61, 64); a̤ and ô (as in *war, nor, warm, norm*; see Guide to Pronunciation, §§ 70 and 113); ĕ and û (as in *her, pur, smirch, lurch, bird, curd*, etc.; see Guide to Pronunciation, §§ 85 and 139); o͞o and u̇ (as in *food, rude, fool, rule*, etc.; see Guide to Pronunciation, §§ 126 and 136); o͝o and u (as in *foot, put, wool, pull*, etc.; see Guide to Pronunciation, §§ 128 and 137).

Besides these sounds there are a number of others which are less closely allied, or less commonly confused, but which, nevertheless, more or less nearly constitute rhyming sounds, and are not infrequently so used by careful writers, such as ô and ŏ; ū and o͞o, u̇; ă and ŏ. In the most important of these cases references are made from the words given under one sound to those given under the other in this vocabulary, and to this note.

§ 5. *Words differently pronounced.* — Some words have more than one pronunciation recognized as being in good usage, and the more common of these, when they can be used in single rhymes in either or both pronunciations, are given in the vocabulary in each group with which they may rhyme; thus, *appulse* is given under *-ulse, ballet* under *-ay, aquiline* under *-in* and *-ine, oblique* under *-ēk* and *-īk*, etc.

§ 6. *Obsolete, archaic, or provincial rhymes.* — There are many cases in the older poets where words are used as rhymes in apparent contradiction to the present rules of rhyming and good pronunciation, but generally the words so used were formerly so pronounced or accented as to constitute proper rhymes, and some of these pronunciations, now obsolete among educated people, are still preserved in local dialects.

Most English words terminating in *-ain*, as *main, rain, gain*, etc., are still pronounced with the ā sound for the *ai*, and this pronunciation is still recognized as good usage in verse and poetry for the word *again*, which is in ordinary speech pronounced only ȧ-gĕn′. *Again* therefore is given under *-ain* as well as under *-en*.

The diphthong *ea* was frequently pronounced ā, and hence the sound of *ea* was the same as that of *ay*; and *peal, real, steal*, etc., were properly used to rhyme with *male, sale, quail*, etc., and *tea* with *obey*, as by Pope.

The diphthong *oi* was formerly pronounced nearly as ī, as in *join, boil, roil*, etc., which were formerly properly used to rhyme with *fine, mile, while*, etc. The word *roil* still preserves its archaic pronunciation in the variant form *rile*, and is provincially only so pronounced; and the word *boil* is similarly still provincially or archaically pronounced bīl.

Final syllables in *-y* and *-ie* were formerly accented, and were pronounced with an ē sound, and so rhymed with other final syllables having an ē sound, as in the following lines from Chaucer: —

> Let see now of your womanly pitee
> He is a kinges brother sone, pardee;
> And, though he were a povre bacheler,
> Sin he hath served yow so many a year,
> And had for yow so greet adversitee,
> It moste been considered, leveth me.

In the case of these words there has been a change in the accent as well as in the vowel sound, the accent having formerly, under the influence of the French, been on the final syllable. Subsequently the accent shifted from the final syllable, and the final vowel sound was changed from that of a ē sound to a ĭ or y̆ sound; and the syllable is now pronounced with such an entire absence of stress that, in serious verse, even when the primary accent is on the antepenult (see *Correspondence in accent*, above), the final syllable is no longer proper for use as a single rhyme, except as a distinct archaism.

Besides these there are many other cases where rhymes occur in the older poets which could no longer be used as such; as the rhyming of *queen, seen*, etc., with *sane, bane*; although many of these are still used in dialectic poetry, to represent the peculiarities of dialects in which obsolete pronunciations survive.

§ 7. In some words which came into English through the French the letter l was silent where it is now always pronounced, as for example in the word *fault*, which was rhymed by Pope, and properly so in his day, with *thought*.

§ 8. *Rhymes by contraction, elision*, etc. — The final two syllables of a word are often pronounced like a single syllable with a long vowel sound, by slurring over or slighting one of the syllables in the pronunciation, or by

dropping a consonant or vowel. Thus *plyer*, *mower*, *sower*, *lower*, etc., as ordinarily pronounced, may be used to rhyme with *lyre*, *fire*, *lore*, *pore*, etc.; and *over* in the poetical form *o'er* is pronounced so as to rhyme with *lore*, *roar*, *pore*, etc.; and *never* in the poetical form *ne'er* rhymes with *fare*, *care*, *stair*, etc. In dialectic or illiterate pronunciation such contractions and elisions are of much more frequent occurrence than in ordinary pronunciation, but these are not given in this vocabulary.

§ 9. *Vocabulary arrangement.* — For the purpose of arranging the words in this vocabulary only that part of the word or last syllable is considered which corresponds in sound with that of its rhymes, and for that purpose this part of each word is considered and treated as a termination or ending. All of these terminations, must, therefore, begin with the last sounded vowel or diphthong of the word.

Any particular word with its rhymes can, therefore, be readily found in this vocabulary by looking for the ending of the word beginning with the last sounded vowel or diphthong. In the case of all diphthongs consider the terminations or endings to begin with the first vowel of the diphthong. Thus in the case of *be*, *band*, *made*, *persuade*, *brain*, *aid*, *fatigue*, *league*, *due*, *blight*, etc., look in the vocabulary for *-e*, *-and*, *-ade*, *-uade*, *-ain*, *-aid*, *-igue*, *-eague*, *-ue*, *-ight*, etc., respectively, and under those entries will be found either the rhyming words or references to the headings under which they are given.

The case of words in *-re*, as for instance *massacre*, is an exception, and these words are given under *-er*.

A PRONOUNCING VOCABULARY OF

COMMON ENGLISH CHRISTIAN NAMES.

WITH THEIR ORIGIN, SIGNIFICATION, FOREIGN EQUIVALENTS, ETC.

☞ The design of the following Vocabulary is, in part, to supplement that of the Vocabulary of Proper Names, which contains only surnames. Besides the English Christian Names, and their corresponding Latin forms, the principal equivalents in modern foreign languages are given in this Vocabulary, as well as those nicknames and diminutives which are well established or are etymologically important.

With one or two exceptions only, no notice is taken in this Vocabulary of surnames, which are often used as Christian names; such, for example, as *Addison*, *Harvey*, *Jefferson*, *Sidney*, etc.

The etymologies given are intended only to indicate the source from which the name is derived (often through some other intermediate language), and do not mean that the English word is in the original form.

NOTE. *The abbreviation* **L. id.** *indicates that the Latin form of the name is the same as the English.*

A CONCISE ACCOUNT

OF THE CHIEF DEITIES, HEROES, ETC.,

IN THE GREEK AND ROMAN MYTHOLOGY.

NOTE. — Most of the Roman or Italic deities became sooner or later identified with Greek deities, so that the Roman and Greek names became interchanged. The larger part of the myths related of the gods by the later Roman poets are derived from the Greek mythology.

Ab'a-ris (ăb'ȧ-rĭs). A Scythian priest of Apollo, said to have ridden through the air on an arrow.

Ab-syr'tus (ăb-sẽr'tŭs). The younger brother of Medea who (according to one legend) was cut up and cast into the sea by Medea when she was pursued by Æetes in her flight with Jason in the Argo.

A-ces'tes (ȧ-sẽs'tēz). A king of Sicily, who entertained Æneas.

A-chæ'us (ȧ-kē'ŭs). Son of Xuthus (a descendant of Deucalion), and ancestor of the Achæans.

A-cha'tes (ȧ-kā'tēz). A trusty (L. *fidus*) companion of Æneas.

Ach'e-ron (ăk'ẽ-rŏn). The bitter river of the infernal regions, over which Charon ferried the souls of the dead.

A-chil'les (ȧ-kĭl'lēz). The son of Peleus and Thetis (see THETIS); hero of Homer's Iliad, and leader of the Myrmidons. He slew Hector of Troy in battle, and was (according to a later tradition) himself slain by Paris by a wound in the heel, his only vulnerable part.

Ac'i-da'li-a (ăs'ĭ-dā'lĭ-ȧ). A surname of Aphrodite (Venus).

A'cis (ā'sĭs). A Sicilian shepherd, son of Faunus, loved by Galatea, and therefore slain by Polyphemus.

A-cris'i-us (ȧ-krĭs'ĭ-ŭs). Brother of Prœtus and ruler of Larissa. He was a grandson of Danaus and father of Danae.

Ac-tæ'on (ăk-tē'ŭn). A celebrated Greek hunter, who, having seen Artemis (Diana) bathing, was changed into a stag and hunted down by his own hounds. According to another myth he angered the goddess by boasting that he excelled her in hunting.

Ad-me'tus (ăd-mē'tŭs). The king of Pheræ, in Thessaly, and one of the Argonauts. When sick he was told by the oracle that he could recover only by some one volunteering to die in his stead, which his wife Alcestis did.

A-do-nai'a (ȧ-dŏ-nī'yȧ), *or* **A-do-ni'as** (ȧ-dŏ-nī'ȧs). A name of Aphrodite.

A-don'is (ȧ-dŏn'ĭs). A Cyprian youth famed for his beauty and beloved by Aphrodite (Venus), but torn in pieces by a wild boar. The gods, to console the goddess, decreed that he might continue to live half the year, during spring and summer.

A-dras'ti-a (ȧ-drăs'tĭ-ȧ). One of the nymphs who tended and nursed Zeus on Mount Ida.

A-dras'tus (ȧ-drăs'tŭs). A king of Argos, father-in-law of Polynices. He commanded the forces in the war of the Seven against Thebes, and alone of the seven returned.

Æ'a-cus (ē'ȧ-kŭs). Son of Zeus and Ægina, who became after death one of the judges in Hades and, in later tradition, the gate-keeper of Hades.

Æ-e'tes (ē-ē'tēz). Son of Helios and Perseis and king of Colchis.

Æ-gæ'us (ē-gē'ŭs). King of Athens; father of Theseus; fabled to have drowned himself in the Ægean sea.

Æ-ge'ri-a. See EGERIA.

Æ-gis'thus (ē-jĭs'thŭs). The seducer of Clytæmnestra, killed by Orestes.

Æ'gle (ē'glē). **1.** One of the Hesperides. **2.** The fairest of the Naiads.

Æ-gyp'tus (ē-jĭp'tŭs). A king of Egypt, whose fifty sons, except Lynceus, were slain on their wedding night by their brides, the daughters of Danaus.

Æ-ne'as (ē-nē'ȧs). A valiant Trojan warrior (son of Aphrodite (Venus) and Anchises), distinguished for his pious care of his father at the capture of Troy. His adventures form the subject of Virgil's Æneid.

Æ'o-lus (ē'ŏ-lŭs). The god or ruler of the winds, which he let out from their prison in the caves of one of the Lipara islands; the son of Hippotas, and ruler of the Æolian islands.

Æs'cu-la'pi-us (ĕs'kū-lā'pĭ-ŭs), *or* **As-cle'pi-as** (ăs-klē'pĭ-ȧs). Son of Apollo, and god of medicine. For raising the dead he was slain by Zeus, and he was afterwards worshiped as a god.

Æ'thon (ē'thŏn). One of the horses to the chariot of Phœbus, or Pallas, or Aurora, etc.

Ag'a-mem'non (ăg'ȧ-mĕm'nŏn). Brother of Menelaus, and commander of the Grecian forces against Troy. He was murdered by his faithless wife Clytæmnestra.

Ag'a-nip'pe (ăg'ȧ-nĭp'pē). A nymph of a well or spring of the same name at the foot of Mount Helicon, sacred to the Muses.

A'jax (ā'jăks). **1.** A son of Telamon, and the strongest and greatest in stature of the Greeks in the Trojan war. **2.** Son of Oïleus, and king of the Locri. He was the swiftest of the Greeks in the Trojan war, except Achilles.

Al-cæ'us (ăl-sē'ŭs). Son of Perseus and Andromeda, and father of Amphitryon.

Al-ces'tis (ăl-sĕs'tĭs). Wife of Admetus, whose life she preserved by dying in his stead. She was brought back from Hades by Hercules.

Al-ci'des (ăl-sī'dēz). **1.** A name of Amphitryon, son of Alcæus. **2.** A name esp. of Hercules, whose stepfather was Amphitryon.

Al-cin'o-us (ăl-sĭn'ō-ŭs). The king of Phæacia who entertained Ulysses when shipwrecked.

Alc-me'ne (ălk-mē'nē). Wife of Amphitryon, and mother of Hercules by Zeus.

Al-cy'o-ne (ăl-sī'ō-nē), *or* **Hal-cy'one** (hăl-). A daughter of Æolus, who drowned herself in grief for the loss of her husband, and was turned into a kingfisher.

A-lec'to (ȧ-lĕk'tō). A Fury.

Al'ex-an'der (ăl'ĕx-ăn'dẽr). A name of Paris.

Al-phe'us (ăl-fē'ŭs). See ARETHUSA.

Al-thæ'a (ăl-thē'ȧ). Mother of Meleager, and sister of Deïaneira.

Am'al-the'a (ăm'ăl-thē'ȧ). The goat that supplied Zeus with milk on Mount Ida.

Am'a-zons (ăm'ȧ-zŏnz). Warlike women of Asia Minor who often engaged in contest with the Grecian heroes.

Am'mon (ăm'mŏn). The Egyptian deity whose chief seat of worship was Thebes. By the Greeks and Romans he was called Zeus, or Jupiter, Ammon. He was sometimes represented in the form of a ram.

Am'phi-a-ra'us (ăm'fĭ-ȧ-rā'ŭs). Brother of Adrastus, one of the Seven who besieged Thebes. He was a seer, and foretold that all but Adrastus would perish in the expedition.

Am-phi'on (ăm-fī'ŏn). Son of Zeus and Antiope, whose skill in music was such that, at the sound of his lyre, stones came together and formed the walls of Thebes.

Am'phi-tri'te (ăm'fĭ-trī'tē). Wife of Poseidon, and mother of Triton.

Am-phit'ry-on (ăm-fĭt'rĭ-ŏn). Son of Alcæus. To win the hand of Alcmene he avenged the death of her brothers on the Taphians.

An-cæ'us (ăn-sē'ŭs). A king of the Samians, who, leaving a cup of wine untasted to pursue a boar by which he was killed, gave rise to

the proverb, "There 's many a slip 'twixt the cup and the lip."

An-chi'ses (ăn-kī'sēz). Father of Æneas, and, next to Adonis, the chief favorite of Aphrodite (Venus) among mortals.

An-drom'a-che (ăn-drŏm'ȧ-kē). Wife of Hector, distinguished for her domestic virtues.

An-drom'e-da (ăn-drŏm'ē-dȧ). Daughter of Cassiopeia and the Ethiopian king Cepheus. She was exposed to a sea monster, but was rescued by Perseus, who married her.

An-tæ'us (ăn-tē'ŭs). A son of Poseidon; monarch of Libya. He was of gigantic size and strength, and invincible so long as he remained in contact with his mother Earth (Gæa). He was slain by Hercules, who held him in his arms.

An-tig'o-ne (ăn-tĭg'ō-nē). Daughter of Œdipus and Jocasta; famous for filial piety.

An-ti'o-pe (ăn-tī'ō-pē). Mother of Amphion and Zethus, who was tormented by Dirce, the jealous wife of her uncle.

A-nu'bis (ȧ-nū'bĭs). The Egyptian god of funeral rites, and the escort of souls to the inferior world, confounded by the Greeks with Hermes. He was represented as a jackal, a dog, or a man with a jackal's head.

Aph'ro-di'te (ăf'rō-dī'tē). The Greek goddess of love and wedlock, who (according to one myth) rose from the foam of the sea at Cyprus; — identified with Venus.

A'pis (ā'pĭs). The bull of Memphis, worshiped by the Egyptians, and (according to some) regarded as the incarnation of the god Osiris.

A-pol'lo (ȧ-pŏl'lō). A deity of the Greeks and Romans, worshiped as the sun-god. He was also god of medicine, divination, archery, and poetry, and leader of the Muses.

A-rach'ne (ȧ-răk'nē). A Lydian maiden, who was changed into a spider for presuming to challenge Athene to a trial of skill in weaving.

A'res (ā'rēz). The Greek god of bloody war, son of Zeus and Hera, delighting in the tumult and horrors of battle. He was fierce and gigantic, but handsome, and was beloved by Aphrodite. The Romans identified him with Mars.

Ar'e-thu'sa (ăr'ē-thū'sȧ). A beautiful Nereid who changed into a fountain on the island of Ortygia when pursued by the river god Alpheus, who, in the form of the river Alpheus, was fabled to have pursued her thither under the sea and there mingled with her waters.

Ar'go (ăr'gō). The ship in which the Argonauts sailed.

Ar'go-nauts (ăr'gō-nȧts). Companions of Jason, who went to Colchis, in the ship Argo, to fetch the golden fleece.

Ar'gus (ăr'gŭs). A mythical person with a hundred eyes, set by Hera to watch Io. He was killed by Hermes, whereupon Hera placed his eyes in the tail of a peacock.

A'ri-ad'ne (ā'rĭ-ăd'nē). Daughter of Minos, king of Crete, who loved Theseus, and gave him a clew of thread which guided him out of the labyrinth of Crete. She sailed away with Theseus, but was abandoned by him on the island of Naxos.

He'ro (hē'rō). A beautiful priestess of Aphrodite at Sestos, in Thrace, beloved by Leander of Abydos, who used to swim over the Hellespont to see her. Leander was finally drowned and Hero threw herself, in despair, into the sea.

He-si'o-ne (hē-sī'ō-nē). Daughter of Laomedon, king of Troy, rescued from a sea monster by Hercules.

Hes-per'i-des (hĕs-pĕr'ĭ-dēz). The nymphs, Aegle, Erytheis, and Hespere (and later also Arethusa), who were set in the garden of the gods to watch the golden apples produced from those given to Hera on her marriage to Zeus. One tradition makes them the three daughters of Atlas and Hesperis.

Hes'pe-rus (hĕs'pē-rŭs), *or* **Ves'per** (vĕs'pĕr). Son of Iapetus and Asia, and brother to Atlas; changed into the evening star.

Hes'ti-a (hĕs'tĭ-à). The Greek virgin goddess of sacrificial fire, and of the hearth; firstborn daughter of Cronos and Rhea. She was zealously worshiped, but had no temple dedicated to her alone in Greece, the hearth fires being her proper sanctuaries. She was identified by the Romans with Vesta.

Hip-pol'y-tus (hĭp-pŏl'ĭ-tŭs). Son of Theseus and the amazon Antiope. He was killed at the instigation of his stepmother, whose advances he had rejected. In a Roman myth he is restored to life by Æsculapius, at the request of Diana.

Hip-pom'e-nes (hĭp-pŏm'ē-nēz). A Greek prince, who beat Atalanta in a race by throwing golden apples before her (which she stooped to pick up), and thus obtained her as his wife. They were both changed into lions.

Hy'a-cin'thus (hī'à-sĭn'thŭs). A beautiful Spartan youth from whose blood, when slain, Apollo caused the hyacinth to spring, or (according to another myth) marked the petals with the letters αι for woe, or Υα for Ὑάκινθος.

Hy'a-des (hī'à-dēz), *or* **Hy'ads** (-ădz). Nymphs whose parentage, names, and number are differently stated; but the number commonly given is seven. They were placed among the stars, being the seven in the head of Taurus, and were thought to bode rain when they rose with the sun.

Hy'dra (hī'drà). In Greek mythology, a water serpent with nine (the number commonly given) heads, of which the middle one was immortal. It infested Lake Lerna; but was slain by Hercules, as one of his seven labors.

Hy-gi-ei'a (hĭ-jĭ-ī'yà) *or* **Hy-ge'ia** (-jē'yà). Daughter, or according to another myth the wife, of Æsculapius; goddess of health, — usually represented as holding a serpent, the symbol of health.

Hy'las (hī'lȧs). A beautiful son of Theodamus, passionately loved by Hercules, by whom he was kidnaped and taken on the Argonautic expedition. Hylas was lost on the coast of Mysia.

Hym'e-næ'us (hĭm'ē-nē'ŭs), *or* **Hy'men** (hī'mĕn). The Greek god of marriage; son of Apollo and Calliope, or, according to others, of Dionysus and Aphrodite.

I-ac'chus (ĭ-ăk'kŭs). In Greek mythology, chief of the gods of the Eleusinian mysteries; sometimes identified with Bacchus or Dionysus.

I-ap'e-tus (ĭ-ăp'ē-tŭs). A son of Uranus and Gæa, and father of Atlas, Prometheus, Epimetheus, etc.

Ic'a-rus (ĭk'à-rŭs). A son of Dædalus, who, in their flight from Crete, flew so high that the sun melted the wax with which his wings were fastened on. He fell into the Icarian, or Ægean, Sea.

I-dom'e-neus (ĭ-dŏm'ē-nûs). A king of Crete, and the leader of the Cretans against Troy. He sacrificed his son to Poseidon to keep a vow made for delivery from peril.

I'lus (ī'lŭs). Son of Tros; founder of Troy, which he named Ilium.

I'o (ī'ō). Daughter of Inachus and Ismene, beloved by Zeus, who, through fear of Hera, turned her into a heifer. She was pursued by a gadfly across the sea (Ionian Sea) into Egypt, recovered her original shape, bore Epaphas, was worshiped as Isis, and married king Telegonus, becoming the ancestress of the royal families of Egypt, Phœnicia, Crete, Argos, and Thebes.

Iph'i-ge-ni'a (ĭf'ĭ-gē-nī'à). Daughter of Agamemnon and Clytæmnestra. Her father sought to sacrifice her to Artemis, whose resentment he had incurred, but the goddess put a doe in her place, and carried her to the Tauric Chersonese, where she became a priestess in the temple of Artemis.

I'ris (ī'rĭs). Daughter of Thaumas and Electra; personification of the rainbow, and messenger of the gods, corresponding, in her relation to Hera, to Hermes as the messenger of Zeus.

I'sis (ī'sĭs). An Egyptian goddess worshiped with Osiris, — represented as a woman with a throne on her head, or with the horns of a cow, an animal sacred to her. Her emblems are the life sign and the lotus, and she had power to open the gates of the nether world and give the deceased landed possessions there. She was identified with Demeter and Persephone.

I'tys (ī'tĭs). The son of Tereus. Procne and Philomela killed him and served a dish of his flesh to his father.

Ix-i'on (Ĭks-ī'ŏn). A king of the Lapithæ, in Thessaly. He was entertained by Zeus at the table of the gods, and became the father of the Centaurs by a phantom which he supposed to be Hera, whom he attempted to seduce. He was punished for his treachery by being chained to a four-spoked, fiery wheel perpetually revolving.

Ja'nus (jā'nŭs). An ancient Italian deity, the god of entrances, beginnings, war, and springs. He is commonly represented with two bearded faces, looking in opposite directions, and making but one head. His temple, as god of war, at Rome, was closed only in time of peace. He was ranked nearly equal to Jupiter.

Ja'son (jā'sŭn). A prince of Thessaly, who, with the aid of Medea, brought away from Colchis the golden fleece, guarded by a sleepless dragon. After his return, he slew his usurping uncle Pelias, and assumed the throne which was his of right.

Jo-cas'ta (jō-kăs'tà). Wife of Œdipus.

Ju'no (jū'nō). In Roman mythology, daughter of Saturn and Ops, and sister and wife of Jupiter, — identified at a later time with the Greek goddess Hera. She was the queen of heaven; the patroness of women, and the goddess of marriage, wedlock, and childbirth; and the ideal of female modesty and prudence.

Ju'pi-ter (jū'pĭ-tẽr), *or* **Di-es'pi-ter** (dĭ-ĕs'pĭ-tẽr). In Roman mythology, the supreme god of heaven, later identified with the Greek god Zeus; son of Saturn, brother of Neptune and Pluto, and brother and husband of Juno; god of the sky, of hospitality and good faith, and, above all, the supreme protector and guardian of the state.

Sat'urn (săt'ŭrn). An ancient Italic god, who at a very early date became identified with the Greek Cronos, with whom, however, he originally had little in common. The later myths make him son of Cœlus and Terra, and father of Jupiter. Having been banished from the throne of heaven by his son, he fled for safety into Italy and taught the people agriculture and the useful arts. The time in which he did this is called the Golden Age.

Sa'tyrs (sā'tẽrz). In Greek mythology, a class of beings connected with the worship of Dionysus, represented as human beings with pointed ears, horns on the forehead, and the tail of a horse or goat. They became identified with the Roman Fauni, and represented the luxurious forces in Nature.

Scyl'la (sĭl'lȧ). **1.** A sea nymph, daughter of Phorcys, changed by Circe into a sea-monster, with dogs about the haunches, and represented as dwelling in a rock cave on the Italian coast, opposite Charybdis on the coast of Sicily. **2.** A daughter of Nisus of Megara, beloved by Minos, for love of whom she took from her father's head a lock on which his life depended. She was changed into a lark.

Sem'e-le (sĕm'ĕ-lē). Daughter of Cadmus, and mother of Dionysus.

Se-ra'pis (sĕ-rā'pĭs). A name of Osiris as judge of the under world.

Si-le'nus (sī-lē'nŭs). The foster-father of Bacchus; lascivious and addicted to drunkenness, but regarded as the god of abstruse mysteries and knowledge. He is represented as a full-bearded old man, with pointed ears, short horns and a flat nose, and often as riding on an ass. He became identified with the Satyrs, the older of whom were called Sileni.

Sil-va'nus (sĭl-vā'nŭs). A Roman god of agriculture, the protector of herds from wolves, trees from lightning, and the defender of boundaries, represented with a sickle in his right hand and a bough in his left.

Si'rens (sī'rĕnz). Three sea nymphs represented with the head, the arms, and the bust of a young woman, and the lower part of the body in the form of a bird (or later, in the form of a fish), who with their sweet voices enticed ashore those sailing by, and then killed them. According to one legend they were the daughters of Acheloüs, a river god; according to another, they were the daughters of Phorcys.

Sis'y-phus (sĭs'ĭ-fŭs). Son of Æolus; king of Corinth, and a noted robber, killed by Theseus. He was condemned in Hades to roll to the top of a hill a huge stone, which always rolled back to the bottom.

Sol (sŏl). The sun god of the Romans.

Som'nus (sŏm'nŭs). The Roman god of sleep, a son of Nox.

Sphinx (sfĭnks). A fabulous monster near Thebes (represented with the head, and often the breasts, of a woman, the body of a lion or dog, and the wings of a bird), which put forth riddles to passers by, and devoured, or cast from the rock where she lived, all who were unable to solve them. Œdipus solved one, whereupon she destroyed herself. The Sphinx of the Egyptians was a beneficent goddess of wisdom personifying the fruitful earth.

Sten'tor (stĕn'tŏr). A Greek herald before Troy, whose voice was said to have been as loud as the voices of fifty men together.

Styx (stĭks). In Greek mythology, a river of the infernal regions, by which the gods swore their most solemn oaths.

Syl-va'nus (sĭl-vā'nŭs). See SILVANUS.

Sym-pleg'a-des (sĭm-pleg'ȧ-dēz). Two great cliffs which swung or moved together and crushed anything that went between them. Jason rowed the Argo through, with only the loss of the rudder, by first sending a pigeon through and then starting as the cliffs receded.

Ta'lus (tā'lŭs). A bronze youth slain by Philoctetes on the Argonautic expedition, with an arrow of Hercules.

Tan'ta-lus (tăn'tȧ-lŭs). A king of Phrygia, son of Zeus, and father

of Niobe and Pelops. For revealing the secrets of the gods, or (another myth) for serving his son as food to the gods, he was condemned to stand in Tartarus in water up to his chin, and under a tree laden with delicious fruits, the water and fruit always receding when he tried to partake of them.

Tar'ta-rus (tär'tȧ-rŭs). A sunless abyss, far below Hades, described among the later poets as the place of punishment for the souls of the wicked. Sometimes used as a synonym of Hades.

Tel'a-mon (tĕl'ȧ-mŏn). One of the Argonauts, son of Æacus, brother of Peleus, and father of Ajax and Teucer. He was king of Salamis, and first scaled the walls, when Hercules took the city of Troy in the reign of Laomedon.

Tĕ-lem'a-chus (tĕ-lĕm'ȧ-kŭs). The only son of Ulysses and Penelope. He went in search of his father after the siege of Troy.

Tel'lus (tĕl'lŭs). The Roman goddess personifying the earth, and represented as a woman with many breasts distended with milk.

Tem'pe (tĕm'pē). A valley of Thessaly through which ran the river Peneus, between Ossa and Pelion; described by the poets as the most delightful spot on the earth.

Tē're-us (tē'rē-ŭs, *or* tē'rūs). A king of Thrace who married Procne, and afterwards her sister Philomela, pretending that Procne was dead. See Itys.

Ter'mi-nus (tĕr'mĭ-nŭs). The Roman god who presided over limits and boundaries.

Terp-sich'o-re (tĕrp-sĭk'ō-rē). The Muse who presided over the choral dances and the dramatic chorus.

Ter'ra (tĕr'rȧ). The Roman goddess personifying the earth, and answering to the Greek Gaia.

Tē'thys (tē'thĭs). Wife of Oceanus, and mother of the sea nymphs and river gods, and of Nereus.

The'se-us (thē'sē-ŭs), *or* **The'seus** (-sūs). One of the most famous of the heroes of Greek legend; son of Ægeus (king of Athens) and Æthra. He captured the bull of Marathon; slew the Minotaur with the help of Ariadne, who loved him; fought the Amazons, by one of whom he was father of Hippolytus; went on the Calydonian boar-hunt; was one of the Argonauts; cut off the head of Medusa; defeated the Centaurs, etc.

The'tis (thē'tĭs). A sea nymph, daughter of Nereus and Doris; beloved by Zeus, he gave her in marriage to Peleus because it had been prophesied that she would bear a son mightier than his father. She was the mother of Achilles.

This'be (thĭz'bē). See Pyramus.

Ti-siph'o-ne (tĭ-sĭf'ō-nē). One of the Erinnyes.

Ti'tan (tī'tȧn). **1.** The name of certain sons of Uranus and Gæa (Heaven and Earth), one of whom, Cronos, killed his father, he in turn being deposed by his own son Zeus; the Titans after a terrible war with Zeus and his brothers and sisters were cast into Tartarus by Zeus (Jupiter), with his thunderbolts, under guard of the Hecatoncheires. Later legends make the Titans the sons of a god named Titan. **2.** A name of Helios, the sun god.

Tī-tho'nus (tī-thō'nŭs). Son (or brother) of Laomedon, and father of Memnon by Eos (Aurora). The gods, at her request, endowed him with immortality but not with eternal youth, and then he became very withered with age Eos turned him into a grasshopper.

Tit'y-us (tĭt'ĭ-ŭs). A huge giant, son of Zeus (Jupiter) and Gæa, slain for an attempt on the chastity of Artemis or Leto, and condemned in Tartarus to have a vulture forever feeding on his liver, which was perpetually renewed.

Trip-tol'e-mus (trĭp-tŏl'ē-mŭs). A king of Eleusis, who was the inventor of the plow, and patron of agriculture. He became a judge in the lower world.

Tri'ton (trī'tŏn). Son of Poseidon and Amphitrite (or Celæno), or according to some, of Oceanus and Tethys; a sea god who acted as the herald of Poseidon, commonly repesented blowing a shell-trumpet.

Tro'ĭ-lus (trō'ĭ-lŭs). Son of Priam and Hecuba, slain by Achilles.

Tro-pho'ni-us (trō-fō'nĭ-ŭs). The legendary builder of Apollo's temple at Delphi. He was worshiped as a hero after his death.

Tur'nus (tûr'nŭs). A king of the Rutuli, in Italy, killed by Æneas.

Tyd'e-us (tĭd'ē-ŭs), *or* **Ty'deus** (tī'dūs). A king of Calydon, father of Diomedes; celebrated for his victory over Eteocles, king of Thebes.

Ty-pho'e-us (tĭ-fō'ē-ŭs), *or* **Ty-pho'eus** (tĭ-fō'ūs). A famous giant, who was struck with lightning by Jupiter, and buried under Mount Etna.

Ty'phon (tī'fŏn). A son of Typhoeus, and father of the winds; he was later confused with Typhoeus.

U-lys'ses (ū-lĭs'sēz). Son of Laërtes, husband of Penelope, father of Telemachus, and king of Ithaca, famous for his wanderings on his return from the Trojan war. He was courageous and full of resources in difficulties. He was also called *Odysseus*.

U-ra'ni-a (ū-rā'nĭ-ȧ). The Muse of astronomy, and the celestial forces.

U'ra-nus (ū'rȧ-nŭs). In Greek mythology, the son of Gæa (Tellus), and, by her, father of the Titans, Cyclopes, and Hecatoncheires. Cronos (Saturn), the youngest of the Titans, dethroned him. The Latin Cœlus was identified with him.

Ve'nus (vē'nŭs). Roman goddess of love and beauty; wife of Vulcan, mother of Cupid, Æneas, etc.; later identified with Aphrodite.

Ver-tum'nus (vĕr-tŭm'nŭs). A Roman god of the seasons (particularly Spring) and of gardens and orchards; the lover of Pomona.

Ves'ta (vĕs'tȧ). The Roman goddess who presided over the family altar and the chief altar of the city, tribe, or people; daughter of Saturn and sister of Jupiter, Neptune, Pluto, Juno, and Ceres; identified with Hestia. Her temple contained a sacred fire, tended by virgins, and never permitted to go out.

Vul'can (vŭl'kȧn). Son of Jupiter and Juno, or of Juno alone, and husband of Venus; lame from his birth, or (in late myths) made so by injuries received in being hurled down from heaven by Jupiter; the god of fire, and of working in metal, and the patron of handicraftsmen. His workshops on earth were supposed to be under volcanoes, as Mount Etna, where, assisted by the Cyclops, he forged the thunderbolts of Jove. He became identified with Hephæstus.

Zeph'y-rus (zĕf'ĭ-rŭs). The west wind, son of Æolus and Aurora, and the ardent lover of Flora.

Ze'tes (zē'tēz). One of the Argonauts, son of Boreas. He and his brother, Calais, drove the Harpies from Thrace.

Ze'thus (zē'thŭs). Son of Zeus and Antiope, and twin-brother of Amphion; of great prowess and skilled in hunting and herding.

Zeus (zūs). The supreme deity of the Greeks, husband of Hera, and generally regarded as son of Cronos and Rhea. He was god of the heavens, of snow, rain, thunder, lightning, heat, and cold. The Romans identified him with Jupiter.

ARBITRARY SIGNS

USED IN WRITING AND PRINTING.

I. ASTRONOMICAL.

1. SUN, GREATER PLANETS, ETC.

⊙, *or* ☉ The Sun.
☽, *or* ☾ The Moon; Monday.
● New Moon.
◐, *or* ☽ First Quarter.
○, *or* ☽ Full Moon.
◑, *or* ☾ Last Quarter.
☿ Mercury; Wednesday.
♀ Venus.
⊕, ⊖, *or* ♁ The Earth.
♂ Mars; Tuesday.
♃ Jupiter; Thursday.
♄ Saturn; Saturday.
♅, *or* ♧ Uranus.
♆ Neptune.
☄ Comet.
✳, *or* * Fixed Star.

☞ The asteroids are now designated by numbers (indicating the order of their discovery) inclosed in a small circle; as, ①, Ceres; ②, Pallas; ③, Juno; ④, Vesta; and the like.

2. SIGNS OF THE ZODIAC.

Spring Signs.
1. ♈ Aries, *the Ram.*
2. ♉ Taurus, *the Bull.*
3. ♊ Gemini, *the Twins.*

Summer Signs.
4. ♋ Cancer, *the Crab.*
5. ♌ Leo, *the Lion.*
6. ♍ Virgo, *the Virgin.*

Autumn Signs.
7. ♎ Libra, *the Balance.*
8. ♏ Scorpio, *the Scorpion.*
9. ♐ Sagittarius, *the Archer.*

Winter Signs.
10. ♑ Capricornus, *the Goat.*
11. ♒ Aquarius, *the Waterman.*
12. ♓ Pisces, *the Fishes.*

3. ASPECTS AND NODES.

☌ Conjunction; — indicating that the bodies have the same longitude, or right ascension.
⚹ Sextile; — noting a difference of 60° in longitude, or right ascension.
□ Quadrature; — noting a difference of 90° in longitude, or right ascension.
△ Trine; — noting a difference of 120° in longitude, or right ascension.
☍ Opposition; — noting a difference of 180° in longitude, or right ascension; as ☉ ☍ ☽; that is, the sun is in opposition to the moon.
☊ Ascending Node; — called also *Dragon's Head.*
☋ Descending Node; — called also *Dragon's Tail.*

4. SIGNS OF NOTATION.

\+ North.
— South.
a Mean distance.
β Celestial latitude.
δ Declination.
e Eccentricity.
λ Longitude.
μ, *or n.* Mean daily motion.
φ { Angle of eccentricity. { Geographical latitude.
⊙ Sun's longitude.
☽ Moon's longitude.

II. BOTANICAL SIGNS.

○ An annual plant.
◯ A perennial plant.
♃ A perennial herb.
△ An evergreen plant.
♄ A plant having a woody stem.
♄ An undershrub.
♄ A shrub.
♄ A large shrub.
♄ A tree.
☌, *or* ♂ A staminate, or male, flower; also, a plant bearing such flowers.
♀ A pistillate, or female, flower; a plant bearing such flowers.
☿ A perfect, or hermaphrodite, flower; also, a plant bearing such flowers.
♁ ♀ Unisexual, or having the male and female flowers separate.
☌ *or* ♁ − ♀ Monœcious.
♀ ♂ *or* ♀ : ♀ Dicœcious.
⌒ A climbing plant.
) Turning or winding to the left.
(Turning or winding to the right.
° Feet. ′ Inches. ″ Lines, or (the usual signs with European writers) ′ Feet. ″ Inches. ‴ Lines.

III. CHEMICAL.

☞ Every elementary substance is represented, in chemical notation, by a symbol consisting of the initial or abbreviation of its Latin name; as, H for hydrogen, O for oxygen, Ag (from *Argentum*) for silver, and the like, each symbol, when used singly, always indicating a single atom or equivalent of the substance represented by it. A compound body is represented by the symbols of the respective constituents written side by side, the number of atoms or equivalents of each constituent, when more than one, being expressed by numbers written after the symbols below the line; as, H_2O, a compound of two equivalents of hydrogen with one of oxygen, forming water.

In case of secondary compounds, as a salt, the original compounds from which the secondary compounds are supposed to be derived are sometimes indicated by separating the symbols of the constituent compounds by commas or periods; as, CaO,CO_2, calcium carbonate.

A number written before the symbol of an element or of a compound designates a corresponding number of equivalents of that element or compound; as, $3SO_3$, three equivalents of sulphuric acid.

IV. MATHEMATICAL.

RELATIONS OF QUANTITIES.

\+ Plus; and; more; — indicating addition; as, $a + b = c$; — used also to indicate that figures have been omitted from the end of a number, or that the latter is approximately exact; as, the square root of 2 is 1.4142136 +.
— Minus; less; — indicating subtraction; as, $a - b = c$; — used also in a similar manner to + to indicate approximate exactness.
±, *or* ∓ Plus or minus; — indicating that the number or quantity to which it is prefixed may have either of the signs + or −; as, $a \pm b$.
× Multiplied by; times; into; as, $a \times b = ab$; $6 \times 4 = 24$.
☞ Multiplication is also often indicated by placing a dot between the factors (as, $4.5.6 = 120$), or by writing the latter, when not numerals, one after another without any sign.
÷, *or* : Divided by; as, $a \div b$; that is, a divided by b; $6 \div 3 = 2$.
☞ Division is also very often indicated by writing the divisor under the dividend, with a line between; as, $\frac{a}{b}$; that is, a divided by b; $\frac{6}{3} = 2$.
= Is equal to; equals; as, $(a+b) \times c = ac + bc$; $6 + 2 = 8$.
> Is greater than; as, $a > b$; that is, a is greater than b; $6 > 5$.
< Is less than; as, $a < b$; that is, a is less than b; $3 < 4$.
≏ Denoting equivalence in area or volume (in geometry).
~ The difference between; — denoting a difference between two quantities without designating the greater; as, $a \sim b$. [$a \propto b$.
∝ Varies as; is proportional to; as,
: Is to; the ratio of; } — used to in-
:: As; equals; } dicate geometrical proportion; as, $a : b :: c : d$; that is, a is to b as c is to d.
∴ Hence; therefore; on this account.
∵ Because. [ity.
∞ Indefinitely great; infinite; infin-
0 Indefinitely small; infinitesimal; also, as a numeral, naught; zero.
∠ Angle; the angle; as, ∠ A B C.
∟ Right angle; as, ∟ A B C; that is, the right angle, A B C.
⊥ The perpendicular; perpendicular to; as, draw A B ⊥ C D.
∥ Parallel; parallel to; as, A B ∥ C D.
○ Circle; circumference; 360°.
⌒ Arc of a circle; arc.
△ Triangle; as, △ A B C; that is, the triangle A B C.
□ Square; as, □ A B C D; that is, the square A B C D.
▭ Rectangle; as, ▭ A B C D; that is, the rectangle A B C D.
√, *or* √‾ Root; — the *radical*

sign, indicating, when used without a figure placed above it, the square root; as, $\sqrt{4}=2$; $\sqrt{4a^2}=2a$. To denote any other than the square root, a figure (the *index*), expressing its degree, is placed above the sign; as $\sqrt[3]{a}$, $\sqrt[4]{a}$, $\sqrt[n]{a}$, etc.

☞ The root of a quantity is also denoted by a fractional index at the right hand side of the quantity and above it, the denominator of the index expressing the degree of the root; as, $a^{\frac{1}{2}}$, $a^{\frac{1}{3}}$, $a^{\frac{1}{5}}$; that is, the square, cube, and fifth roots of a, respectively.

——— Vinculum, } indicate that
( ) Parenthesis, } the quantities
[ ] Brackets, } to which they
{ } Braces, } are applied, or
| Bar, } which are inclosed by them,

are to be taken together; as, $\overline{x+y^2}$; $2(a+b)$; $a\times(b+c[e+d])$; $+\frac{x}{y}\,|\,z$.

f, *or* F Function; function of; as, $y=f(x)$; that is, y is, or equals, a function of x.

☞ Other letters or signs are frequently used to indicate functions; as, f, ϕ, ϕ', ψ, π, and the like.

d Differential; as, dx; that is, the differential of x.

δ Variation; as δx; that is, the variation of x.

Δ Finite difference. [tive.

D Differential coëfficient; deriva-

☞ The letters *d*, δ, Δ, D, and sometimes others, are also variously employed prefixed to quantities to denote that the differentials, variations, finite differences, or differential coefficients of these quantities are to be taken.

$\int$ Integral; integral of;—denoting that the following expression is to be integrated; as, $\int 2x dx = x^2$; that is, the integral of $2x dx$ is x^2.

☞ If integration is to be performed more than once, the sign is repeated once for each time; for a number of times greater than three, an index is commonly written at the right hand above; as, $\int^m x dx^m$; that is, the mth integral of $x dx^m$.

$\int_b^a$ denotes that the integral is to be taken between the value b of the variable and its value a. $\int^a$ denotes that the integral ends at the value a of the variable, and $\int_b$ that it begins at the value b. These forms must not be confounded with the similar one indicating repeated integration, or with that indicating the integral with respect to a particular variable.

Σ Sum; algebraic sum;—commonly used to indicate the sum or summation of finite differences, and nearly like *f*. [logarithms.

M The modulus of any system of

ϵ Residual.

g The acceleration of gravity, or (very nearly) 32.2 feet per second.

π The number 3.14159265+; the ratio of the circumference of a circle to its diameter, of a semicircle to its radius, and of the area of a circle to the square of its radius. In a circle whose radius is unity, it equals the semi-circumference, and hence may designate an arc of 180°.

° Degrees of arc; as, 60°, sixty degrees.

′ Minutes of arc; as, 30′, thirty minutes. [seconds.

″ Seconds of arc; as, 20″, twenty

′, ″, ‴, etc. Accents used to mark quantities of the same kind which are to be distinguished; as, a', a'', a''', etc., which are usually read *a* prime, *a* second, *a* third, etc.

^{1}, ^{2}, ^{3}, ^{n}, etc. Indices placed above, and at the right hand of, quantities to denote that they are raised to powers of the degrees so indicated; as, a^1; that is, the first power of a; a^2, the square of a; etc.

VI. MEDICAL.

℞ (Gr. ἀνά.) Of each.

℞ Take.

☞ This character is reputed to have been originally the sign of Jupiter, ♃, placed at the top of a formula to propitiate the king of the gods.

S (L. *Signa.*) Mark;—used to call attention to directions to be put on the medicine package.

APOTHECARIES' WEIGHTS.

℔ Pound.

ʒ Ounce; as, ʒ i, one ounce; ʒ ss, half an ounce; ʒ iss, one ounce and a half; ʒ ij, two ounces, etc.

ʒ Drachm; as, ʒ i, one drachm; ʒ ss, half a drachm; ʒ iss, one drachm and a half; ʒ ij, two drachms, etc.

℈ Scruple; as, ℈ i, one scruple; ℈ ss, half a scruple; ℈ iss, one scruple and a half; ℈ ij, two scruples, etc.

APOTHECARIES' MEASURES.

C (L. *Congius.*) Gallon.

O, *or* 0 (Lat. *Octarius.*) Pint.

ʒ Ounce, or *f* ʒ fluid ounce.

ʒ Drachm, or *f* ʒ fluid drachm.

♏ Minim, or drop.

VII. MISCELLANEOUS.

&, &c, &c, &c And. — &c. (*Et cætera.*) And the rest; and so forth; and so on; and the like.

℟ Response;—indicating the part repeated by the congregation in a responsive religious service.

℣ Versicle;—indicating the part recited or sung by the priest.

✠, *or* + A sign of the cross used by the pope, and by Roman Catholic bishops and archbishops, immediately before the subscription of their names. In some service books, it is used in those places where the priest is to make the sign of the cross.

×, *or* + A character customarily made by persons unable to write, when they are required to execute instruments, his name being added by another person; as, his John × Smith mark.

7ber, September; 8ber, October; 9ber, November; 10ber, December.

8vo, *or* 8°. Octavo; eight leaves to

12mo, *or* 12°. Duodecimo; twelve leaves to a sheet.

16mo, *or* 16°. Sexto-decimo; sixteen leaves to a sheet.

18mo, *or* 18°. Octo-decimo; eighteen leaves to a sheet.

☞ Other sizes are 24mo *or* 24°, 32mo *or* 32°, 36mo *or* 36°, 48mo *or* 48°, 64mo *or* 64°, 72mo *or* 72°, 96mo *or* 96°, .128mo *or* 128°. These sizes are rare, and are commonly called twenty-four-mo, thirty-two-mo, etc., or twenty-fours, thirty-twos, etc.

♁ *or* ♂ Male;—used in Zoölogy.

♀ Female;—used in Zoölogy.

VIII. MONETARY, ETC.

$ Dollar, *or* Dollars; as, $1; $200.

c Cent, *or* cents; as, 12c; 33c.

£ Pound, *or* pounds (sterling); as, £1; £45.

℔ Pound, *or* pounds (in weight); as, 1℔; 24℔.

@ At, *or* to; as, silk @ $2 per yd.

℔ Per; as, sheep $4 ℔ head.

% Per cent; as, discount 6% = $10.

℀ Account; as, J. Smith in ℀ with J. Jones.

/ Shilling, *or* Shillings; as, ⅙ = 1s. 6d.; ⅚ = 2s. 3d.

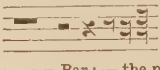
A 1 The designation of a first-class vessel, in Lloyd's Register of British and Foreign Shipping; the letter denoting that the hull is well built and seaworthy, and the figure the efficiency of her rigging, anchors, etc. A figure 2 (A 2) would imply insufficiency in the latter.

XX Ale of double strength.

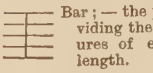
XXX Ale of triple strength.

IX. MUSICAL.

Staff with notes, — semibreve (whole tone), minim, crotchet, quaver, semiquaver, and demisemiquaver. A dot after a note adds to it half the length of the note without the dot.



Rests; — corresponding to the notes above.



Bar; — the perpendicular dividing the notes into measures of equal or a given length.

Double bar; — marking larger divisions, as the end of a verse.

G clef; — indicating that every note on the second line is to be sounded as G of the natural scale.

F clef, or bass clef; — indicating that every note on the fourth line is F of the natural scale.

C clefs; — indicating that every note on the line on which it is placed is C of the natural scale.

Flat.

Double flat; — lowering a note already lowered a half step.

Single flat; — used after a double flat.

Sharp.

Double sharp.

Single sharp; — used after a double sharp.

Natural; — used to counteract previous ♯ or ♭.

Repeat; — sometimes the dots are placed at the beginning.

Common time.

Sign; — used to mark the point to which reference is made, or from which a repetition is to begin.

PUBLISHERS' STATEMENT.

THIS book aims to fill the ideal of a dictionary of the first class in quality and the second class in size. The American people have been educated to a very high standard as to the kind of dictionary they require for daily use. Large and costly volumes which in other countries are rarely owned or consulted except by scholars and specialists are part of the accustomed furniture of the ordinary American home. This is largely the result of the work of Noah Webster and his successive editors. "Get the Best" has been the motto of the Webster publishers, and the public have been educated until nothing less than the best will satisfy them.

But "the best" is a term of various applications. The requirements of a complete and exhaustive dictionary are met by Webster's International, which is a library in itself. Something is needed which is equally trustworthy but more condensed, lower in price, easier to handle and consult. The worker in study or office, crowded for space and time, wants a dictionary that will stand on a shelf close beside him, along with a few other prime necessities; a book that he can grasp with one hand and swiftly consult for the special need of the moment. This is just the want which the Collegiate meets. It is essentially a busy man's dictionary.

Such a book, if rightly made, is almost the masterpiece of lexicographic art. Condensation is one of the severest tests of literary merit. Every editor knows that a column article is an easy achievement compared to a telling paragraph. To draw the pith from the stalk requires the artist's hand.

The preparation of the present book has included two stages. The first stage was the making of the International itself, — a ten years' labor by a large corps of editors and a host of special contributors. The second stage was the reproduction of the essential features of this elaborate work upon a reduced scale. It was a task requiring the nicest judgment and closest application, a natural aptitude and trained faculty. Labor of this kind and of this degree of merit seldom wins adequate recognition for the laborer, but it secures a serviceable quality to his work, which is his best reward. This quality of serviceableness and constant utility in the present book can be fully appreciated only as it is tested by daily use.

It has been named The Collegiate Dictionary because it stands at the head of a series of abridgments the titles of which correspond to the ascending grades of schools, from primary to academic, and now a step higher. It is believed that it is specially adapted to the wants of such college and university students as are not provided with the International. The scholarly quality of the larger work has not been sacrificed in this abridgment. Thus the etymologies, which are a distinguishing excellence of the International, are here given in their substance with much fullness. At many points the wants of the college student and of the journalist or business man run close together. The principle of university extension has a wide application. Our Chautauquas and summer schools are a meeting-ground between

the different grades of liberal education. On a similar principle, this book is intended to be scientific enough for the scholar, and practical enough for the business man; and it will be more valuable to the scholar for its practicality and to the business man for its science.

To the body of the work there are appended various tables and supplements composed of fresh and valuable material, which are enumerated in the Table of Contents and the Preface. For the book as a whole we venture to claim that in its class and for its purpose it has no superior and no equal. Its scholarship, utility, and convenience we leave to the judgment of the public and to the sure test of time and use.

Webster's Collegiate Dictionary.

PRAISE FROM EMINENT EDUCATORS.

Le Baron R. Briggs, A.M., Dean of Harvard College, says:—I cannot fail to find Webster's Collegiate Dictionary of great use.

Lewis E. Gates, A.B., English Department Harvard University, says:—I have found Webster's Collegiate Dictionary a thoroughly serviceable volume. It seems to me a marvelously compact and well edited book. I should recommend every college student to buy it in case he is unable to afford an unabridged dictionary.

Arlo Bates, A.M., Litt.D., Head of English Department, Mass. Inst. of Technology, says:—Webster's Collegiate seems to me the best dictionary of its class that we have.

Nicholas Murray Butler, Ph.D., Columbia University, New York, says:—I find Webster's Collegiate Dictionary on examination to be exactly what you say it is, first class in quality and second class in size, and therefore admirably adapted for everyday use upon the desk.

J. G. Schurman, D.Sc., LL.D., President of Cornell University, says:—The condensation in Webster's Collegiate Dictionary seems well done, and I judge the volume will be very useful to those who find the International too bulky or too costly.

Franklin Carter, Ph.D., LL.D., President of Williams College, says:—I have examined the Collegiate Dictionary sufficiently to see that it has all the accuracy and excellent plan of the International, adapted for the student's needs.

Wm. F. Warren, S.T.D., LL.D., President of Boston University, says:—Happy the collegian who, from the beginning of his course, can command such an aid to accurate thinking and to felicitous expression!

Through its influence upon a generation yet young, the work will do much toward carrying the unique authority of Webster far forward into the coming century.

A. S. Draper, LL.D., President of University of Illinois, says:—Webster's Collegiate Dictionary is up to the Webster standard and there is none better than that. In form it is precisely what is wanted in everyday student life at college.

Albert S. Cook, Ph.D., L.H.D., of the English Department, Yale University, says:—The scholarly qualities for which the International is famous mark this also, especially the thoroughness, exactness, and brevity of definition. The Vocabulary of Rhymes is a welcome addition, and so is the Glossary of Scottish Words and Phrases.

T. R. Lounsbury, L.H.D., LL.D., of Yale University, says:—I have kept your Collegiate Dictionary by me for some time, have looked it over with a good deal of care and have consulted it frequently. I have no hesitation in expressing my high opinion of its merits. To me it seems most admirably adapted to the place it is designed to fill.

C. K. Adams, LL.D., President of University of Wisconsin, says:—Webster's Collegiate Dictionary is admirable. Though the type is small, the impression is very clear, and the amount of information compacted within so small a space is remarkable. The engravings are excellent, definitions are discriminating, and the supplementary lists are invaluable.

Rev. J. W. Bashford, Ph.D., D.D., President of Ohio Wesleyan University, says:—Webster's Collegiate Dictionary is certainly an admirable condensation of the International. With its more than a thousand well filled pages it is large enough for all practical purposes for millions of American homes. Its circulation will promote public intelligence.

Charles C. Harrison, LL.D., Provost of University of Pennsylvania, says:—Webster's Collegiate Dictionary is eminently worthy of this title, and for most practical purposes just the dictionary that the student needs. It finds immediate and permanent use in this office, and I imagine that it will be rarely that I need go beyond it.

Wm. E. Boggs, D.D., LL.D., Chancellor of University of Georgia, says:—I find that Webster's Collegiate Dictionary possesses its full share of the merits belonging to the great "International" and its family. It is moreover admirably adapted to the purse of many students and to the time of the man of business.

Webster's Collegiate Dictionary.

PRAISE FROM EMINENT EDUCATORS.

Francis L. Patton, D.D., LL.D., President of Princeton University, says:—I am glad to express the pleasure I have had in looking through Webster's Collegiate Dictionary. I am sure that it will prove to be very serviceable and that it is especially adapted to the wants of those for whom it is particularly prepared.

Daniel C. Gilman, LL.D., President of Johns Hopkins University, says:—My interest in your series is unabated, and a perusal of the preface reminds me of the many happy hours which I passed in a careful scrutiny of the pages of the "Unabridged." In Webster's Collegiate Dictionary, you seem to have hit upon an extremely convenient form for ready reference. The book is large enough to answer the ordinary inquiries; compact enough to be handled with rapidity and ease.

Rt. Rev. Mgr. Thomas J. Conaty, D.D., Rector Catholic University of America, says:—I find your Webster's Collegiate Dictionary very convenient for reference and most satisfactory in all that it claims to do. Everything seems to be well arranged, and to my mind it is admirably adapted for collegiate students.

A. Morrissey, C. S. C., President University of Notre Dame, Notre Dame, Ind., says:—I find Webster's Collegiate Dictionary an admirable work in every way and its convenient size makes it desirable for college students.

W. J. Tucker, D.D., LL.D., President of Dartmouth College, Hanover, N. H., says:—I have for a long time made use of the International edition of Webster. The condensation which you have put out in the form of a Collegiate Dictionary seems to me to realize your purpose and to satisfy any educational demand.

Wm. DeW. Hyde, D.D., LL.D., President of Bowdoin College, Brunswick, Me., says:—Webster's Collegiate Dictionary appears admirably adapted for school and college use; and sufficiently comprehensive to meet all ordinary requirements.

Charles Mills Gayley, Professor of English Literature, University of California, says:—I find Webster's Collegiate Dictionary excellently adapted to its purpose, and shall take pleasure in bringing it to the notice of my classes.

Cyrus Northrop, LL.D., President of the University of Minn., says:—Webster's Collegiate Dictionary is excellent because it contains the most essential parts of the International, is not so large as to be unwieldly, and has a system of indicating pronunciation which everyone can understand. It ought to have a very large sale, for it supplies a public need.

J. M. Taylor, D.D., LL.D., President of Vassar College, says:—Webster's Collegiate Dictionary has the same conveniences of arrangement that make the International so desirable. It will meet a large demand on the part of young students for something less cumbrous and less costly than the International, and I should suppose would have an equally useful sphere in a large number of families.

Rev. Andrew V. V. Raymond, D.D., LL.D., President of Union College, Schenectady, N. Y., says:—I have been familiar with the large edition of Webster's International Dictionary and am specially pleased with the abridged issue for the use of colleges. It is better than anything that I have seen claiming to meet the same need.

L. Clark Seelye, D.D., LL.D., President of Smith College, says:—Webster's Collegiate Dictionary is the most satisfactory work I have yet seen for the students who desire a smaller and less expensive dictionary than Webster's International. I am much obliged to you for the opportunity you have given me to examine it, and for the aid you have rendered, by your publications to sound learning.

E. A. Alderman, President of the University of North Carolina, says:—Webster's Collegiate Dictionary is by far the most convenient and useful dictionary I have seen in recent years. It contains in a compass not cumbersome all the essentials of the great dictionaries. I warmly commend it to the students.

Charles W. Dabney, Jr., Ph.D., LL. D., President of University of Tennessee, says:—Webster's Collegiate Dictionary appears to be the great International in a nutshell. Nothing could be more convenient or satisfactory for the desk. It is not too large, but is still large enough to answer in brief, succinct words all the questions likely to be asked of it.

Webster's Collegiate Dictionary.

PRAISE FROM EMINENT EDUCATORS.

A. S. Downing, A.M., Principal of New York Training School for Teachers, New York, says:—The Collegiate is the most complete and handy dictionary for reference that I have yet seen.

A. P. Marble, Ph.D., Assistant Superintendent of Schools, New York, says:—The Collegiate includes all the essentials and excludes that which is rarely used. It is easily consulted, hence more often used.

J. M. Greenwood, Superintendent of City Schools, Kansas City, Mo., says:—For the college student and the average reader Webster's Collegiate Dictionary contains as much matter as is absolutely necessary for intelligent reference. The essential features of the larger work are retained in a much smaller and more convenient size.

W. A. Mowry, Ph.D., President Martha's Vineyard Summer Institute, says:—I am very much pleased with the Collegiate. I should think the public at large would find this the most useful dictionary of its size in our language.

Hon. W. W. Stetson, State Superintendent of Education of Maine, says:—The Collegiate Dictionary impresses me as being an exceptionally valuable reference book. I wish that our schools which cannot provide themselves with the International might have copies of this work.

Hon. Mason S. Stone, State Superintendent of Education of Vermont, says:—I heartily commend the Collegiate to school officials as being unsurpassed as a dictionary for the schoolroom.

Hon. J. J. Doyne, State Superintendent of Public Instruction of Arkansas, says:—I consider Webster's Collegiate Dictionary a most excellent book and well adapted to the needs of the average school

J. A. Shawan, Superintendent of Schools, Columbus, Ohio, says:—I can most heartily recommend Webster's Collegiate Dictionary. I find it very handy and satisfactory.

W. N. Hailman, Ph.D., Superintendent of Schools, Dayton, Ohio, says:—The Collegiate furnishes all the information required with the greatest possible economy of time and effort.

A. F. Nightingale, Superintendent of High Schools, Chicago, says:—Webster's Collegiate is exactly the kind of dictionary which every college student, secondary school, every teacher, needs and cannot well get along without. The schools everywhere will demand it.

E. H. Mark, Superintendent of Schools, Louisville, Ky., says:—The Collegiate Dictionary is just what I have wished for some time. It will be just what we want for the pupils of the secondary and intermediate grammar schools.

J. H. McCallie, Superintendent of Schools, Knoxville, Tenn., says:—Its clear print, strong binding, and size will commend it to teachers in the intermediate and high school grades.

J. L. Brooks, President of Tennessee State Teachers Association, says:—The Collegiate is convenient in size, and its concise definitions and etymologies make it a most desirable dictionary. I would be glad to see it in every Tennessee home.

Lawrence C. Hull, Principal Academic Department, Polytechnic Institute, Brooklyn, says:—The Collegiate is a valuable addition to the working library of any student, whether in college or secondary school. I shall advise our boys to use it and try to own it.

G. M. Phillips, Ph.D., Principal State Normal School, West Chester, Pa., says:—The Collegiate is a worthy second to your great International Dictionary, which is high enough praise.

Franklin S. Edmonds, Principal Central High School, Philadelphia, says:—I have been very much interested in the Collegiate Dictionary and use it constantly. The glossary of Scottish words will appeal greatly to the literary class.

James W. Simmons, Superintendent of Schools, Stevens Point, Wis., says:—The Collegiate is by all means the everyday reference book for the schoolroom. It is up to the mark in every respect.

O. D. Mathewson, Examiner of Teachers, Barre, Vt., says:—The Collegiate Dictionary is the best of its class. It is just the dictionary for district schools and higher grammar school grades.

Webster's Collegiate Dictionary.

CRITICAL JUDGMENTS BY LEADING PUBLICATIONS.

The Journal of Education, Boston, says:—Webster's Collegiate Dictionary must become an indispensable part of the student's equipment. The definitions are as lucid and exact as in the International, which is unsurpassed in its class.

The School Journal, New York, says:—The Collegiate has the accuracy, clearness, and general excellence of the famous International, which ought to be found in every schoolroom in the land. It supplies the need of an intermediate dictionary.

The American School Board Journal, Milwaukee, says:—The International is the reconized authority of the American schoolroom, enjoying a fixed and permanent place. The etymologies, which are a distinguishing excellence of the International, are retained in the Collegiate with considerable fullness, amply sufficient for ordinary needs. The appendix is a veritable treasury of facts.

The School Weekly, Chicago, says:—Webster's Dictionary needs no introduction. The teachers and pupils of the Americas refer to it constantly. For quick reference, students and business men will use the Collegiate many times when they would once look out a word in the larger volume. We are all "brought up" on Webster.

The Pennsylvania School Journal, Lancaster, says:—Everybody knows the International, and this is the great dictionary reduced in size, but not reduced in those features that have made it what it is, a generally recognized authority for spelling, pronunciation, definition, and etymology of the English language.

The Western School Journal, Topeka, says:—The Collegiate is an excellent dictionary for use in high schools and colleges, and also for the general reader.

The Ohio Educational Monthly, Columbus, says:—The Collegiate Dictionary supplies the great need for an abridged work. It is admirably adapted to everyday use.

The Canada Educational Monthly, Toronto, says:—It is admirably adapted to the purpose for which it was intended, being compact and easily handled, and retaining everything that is required.

The Nation, New York, says:—That a much wider class will find their daily requirements more than met in the Collegiate is past question. In short, the new Webster will commend itself.

The Public Opinion, New York, says:—A conspicuous advantage of the Collegiate Dictionary is the method by which pronunciation is indicated; namely, by respelling with the diacritical marks that are familiar to everyone. This will give the book a distinct advantage over the dictionary employing arbitrary signs which must be mastered before the indicated pronunciation can be understood.

The Chatauquan, New York, says:—An innovation in bookmaking is found in Webster's Collegiate Dictionary. It will especially commend itself to those who object to unwieldy volumes, the book being of moderate size and well adapted for daily use upon the desk.

The Saturday Evening Post, Philadelphia, says:—Webster's Collegiate Dictionary is designed especially to meet the wants of students. The appendix contains a good working glossary of Scotch words. For ordinary uses it is a most serviceable work.

The Argonaut, San Francisco, says:—In its vocabulary the new book is exceptionally complete, choosing with unusual wisdom to include the newer words. The Scottish glossary is the most complete in its contents of any equally accessible compilation of Scottish terms.

The Army and Navy Journal, New York, says:—In the Collegiate appear all the newer words and all technical and scientific words which are likely to be encountered in a wide course of reading.

The Country Gentleman, Albany, says:—There is a distinct need for a dictionary condensed, portable, adequate for family use, easy to handle. This need we believe is most satisfactorily met by Webster's Collegiate Dictionary.

The Farm, Stock and Home, Minneapolis, says:—In its vocabulary the Collegiate is exceptionally complete, more so than any other of its class. No better dictionary could be placed in the hands of one whose knowledge of English is limited.

Webster's Collegiate Dictionary.

CRITICAL JUDGMENTS BY LEADING PUBLICATIONS.

The Tribune, New York, says:—Webster's Collegiate Dictionary is a handy volume. The vocabulary is pruned of the less familiar technical terms, of many obsolete and rare literary words; each word is given its place in alphabetical order, and the practical convenience of the general reader is considered throughout.

The Public Ledger, Philadelphia, says:—The Collegiate Dictionary is just what every writer and every student will make room for on his work table, and find the best upon which to form the "dictionary habit."

The Herald, Boston, says:—The Collegiate is extensive enough and scientific enough for the scholar, and practical enough for the business man and the journalist. For ninety-nine people out of a hundred this dictionary is ideal.

The Tribune, Chicago, says:—In the Collegiate practically the whole of the meat and substance of the great "International" is preserved. The compilers have succeeded remarkably well in their aim of putting the most essential part of the International into a form that would meet the needs of the general reader and college student.

The Globe-Democrat, St. Louis, says:—The newest dictionary of the Webster series is the Collegiate, which supplies the need for an abridged dictionary which shall be full, accurate, and authoritative; well adapted for the requirements of the scholar, yet practical enough for the business man and other busy persons.

The Constitution, Atlanta, says:—In every respect the Collegiate Dictionary is thoroughly up to date. Brevity has been obtained without the sacrifice of accuracy.

The Picayune, New Orleans, says:—The Collegiate, which is a revision of the International, possesses many features which demand commendation. The volume has been reduced in bulk without losing anything in accuracy or scholarship.

The Chronicle, San Francisco, says:—To any one who wishes a moderate sized lexicon, we warmly commend the Collegiate, as it is so well condensed and so admirably arranged for ready reference.

The Statesman, Calcutta, India, says:—On its merits we can warmly recommend the Collegiate Dictionary. Useful and scholarly, it is a credit in its design to the judgment of its editors. He who buys it gets value for his money.

The Englishman, Calcutta, India, says:—An ideal dictionary for all ordinary purposes is Webster's Collegiate. It is full enough for general requirements.

The Outlook, New York, says:—Webster's Collegiate Dictionary is an abridgment from the International in moderate compass and of a moderate price. It is a happy medium between the unabridged and the too abridged.

The Independent, New York, says:—Webster's Collegiate is a stout octavo which omits obsolete words but retains all scientific and current words. It is a capital book for the use of those who want something smaller than the big quarto.

The Churchman, New York, says:—The Collegiate is a remarkable illustration of lexicographical ability and practical common sense.

The Congregationalist, Boston, says:—The Collegiate Dictionary embodies most of the qualities of the International, having noteworthy accuracy and clearness. All in all, it is a thoroughly admirable piece of work, and use will prove its value to the owner.

The Interior, Chicago, says:—The Collegiate will be a welcome convenience to the literary or professional man and to the general reader, not as superseding the great dictionaries, but as specially convenient and satsfactory for rapid reference.

The Epworth Herald, Chicago, says:—The Collegiate is the most useful and desirable dictionary. One feature that is peculiarly its own is a Scottish glossary of words and phrases, which is most complete, and accurately indicates the pronunciation of the Scottish dialect.

The Ave Maria, Notre Dame, Ind., says:—The editor of Webster's Collegiate Dictionary is evidently a practical teacher with clear and comprehensive ideas of a student's need. He has produced an ideal working dictionary.

THE HIGH STANDING OF

Webster's International Dictionary

Upon which

Webster's Collegiate Dictionary

Is based, is indicated by the following Testimonials.

Supreme Court of United States.

Hon. Melville W. Fuller, *Chief Justice.* I regard it as of the utmost value in accuracy of definition and have found it in all respects complete and thorough.

Hon. John M. Harlan, *Justice.* The International is not surpassed by any existing dictionary of the English language. No dictionary is more accurate in its definitions, or more reliable in other respects.

Hon. Horace Gray, *Justice.* I always considered Webster's Dictionary as the best in the language in the matter of definitions.

Hon. D. J. Brewer, *Justice.* The International Dictionary is the perfection of dictionaries. I commend it to all as the one great standard authority.

Supreme Court of Canada.

Sir Oliver Mowat, *Minister of Justice.* From the examination which I have had occasion to make of Webster's International Dictionary and its important appendices, I have learned something of its thoroughness and great value. The enterprise of its publishers highly merits recognition and reward.

John Wellington Gwynne, *Judge.* It is indeed a superb work, and it is impossible to appreciate too highly the vast learning and labor which have been expended in its preparation. No library, public or private, can be complete without it.

Similar testimonials have been given by other Judges of the Supreme Courts of the United States and Canada.

State Supreme Courts.

New York. The International seems to us very full and complete. It is a satisfaction to see this standard work retain its well earned position; in no respect falling behind its numerous rivals, however remarkable for their extent and accuracy.

Pennsylvania. The present edition (the International) appears to us not only to maintain its place as the accepted highest authority on definitions, but also to embody the results of the last thirty years' unprecedented research in etymology and orthography, in such accurate and compendious form, that no other single volume is so valuable or so satisfactory.

Illinois. Webster's Unabridged Dictionary has long been looked to by this court, as standard authority on definitions and orthography. The International is, and will be, consulted with greater confidence, because of its completeness to date.

Connecticut. For the compactness and accuracy of its definitions Webster's International Dictionary is unrivaled. It is, and has been for many years, the leading authority in the courts of Connecticut.

Texas. The International is especially valuable to the courts and to the legal profession, on account of the accuracy of its legal definitions. The additions and improvements of the latest edition leave nothing to be desired.

California. There is no other single book so valuable to the judge, the lawyer, the literary or business man, as the International. No other book now in existence can be successfully put in its place.

Similar testimonials have been given by members of all the other State Supreme Courts.

College Presidents.

Rev. Timothy Dwight, D.D., LL.D., *Yale University.* This work will be of greatest service to the American public, and will, I am sure, be regarded by scholars as a work of the highest merit and value.

Charles W. Eliot, LL.D., *Harvard University.* I propose to place it in the office of the President of Harvard University as a reference book. It is a wonderfully compact storehouse of accurate information.

Rev. William R. Harper, Ph.D., D.D., *University of Chicago.* A copy of Webster's International Dictionary always lies on my table and I find myself constantly referring to it. My satisfaction in using it constantly increases. It is thoroughly reliable and full of just the information one wishes to secure.

D. C. Gilman, LL.D., *Johns Hopkins University.* To say that "Webster" was never so good as now, is but slight praise. It grows better at each revision.

Rev. J. M. McGuckin, D.D., *Rector of University of Ottawa.* I find Webster's International a very complete, accurate, and excellent dictionary of the English language. It is at once a popular and highly scientific work. I consider it as almost indispensable for every professor, student, and writer of English.

Sir Anthony C. Brownless, LL.D., *Chancellor of University of Melbourne, Australia.* This great work will be so absolutely necessary for all scholars and for literary and scientific men, that no library can be complete without it.

Similar testimonials have been given by nearly all of the Presidents of Universities and Colleges of the United States and Canada.

State Superintendents of Schools.

New York. The International is easily king among books, and royally gives for the asking just the information needed and just enough of it. We should be a better educated people if a copy of this work could be placed in every home and school library in the land. — CHARLES R. SKINNER.

Massachusetts. I regard it as a special boon to those who are called upon to consult dictionaries freely, that so much valuable matter has been put into so compact, accessible, and satisfactory shape. — FRANK A. HILL.

Illinois. In its latest form the International is clear, exact, well arranged, and compact. It has honored every draft ever made upon it. I wish it were upon the desk of every teacher. — ALFRED BAYLISS.

Ohio. I can wish no better thing for the schools of Ohio than that every boy and girl should have the advantage of its accurate information and assistance. — LEWIS D. BONEBRAKE.

Minnesota. I am proud to say that a copy may be found in each of the several thousand school districts in this State. — J. H. LEWIS.

Tennessee. I heartily endorse Webster's International Dictionary and think it the best work published. — MORGAN C. FITZPATRICK.

California. I regard the International as superior to all other dictionaries, because I can more easily and readily obtain the information sought from it than from any other. — THOMAS J. KIRK.

Similar testimonials have been given by all the State Superintendents of Schools now in office.

Additional Testimonials relating to Webster's International Dictionary upon which work Webster's Collegiate Dictionary is based.

Statesmen and Scholars.

Hon. William McKinley, *Ex-Governor of Ohio, now President of the United States.* I cannot better express my high opinion of Webster's International Dictionary than to inform you that it is the standard in the Executive Department of Ohio.

Hon. Thomas B. Reed, *Speaker in the House of Representatives.* I have examined Webster's International Dictionary and have found it a most excellent and valuable compilation. It responds in practice to the favorable expectation which I formed of its usefulness.

Sir Julian Pauncefote, G. C. B., G. C. M. G., *Ambassador Extraordinary and Plenipotentiary of Great Britain to the United States.* I have much pleasure in expressing my appreciation of the extraordinary learning and industry which have been bestowed on this valuable work.

Hon. William T. Harris, *United States Commissioner of Education.* Webster's International Dictionary is in constant use in this office, and is regarded as the highest authority in matters of orthography, pronunciation, and definition.

John Russell Young, *Librarian of Congress.* I have always regarded the International Dictionary as one of the noblest achievements of American energy, enterprise, and genius.

Hon. John A. Cockburn, M.D., *Minister of Education, Adelaide, South Australia.* Webster's International Dictionary is authorized and in constant use in the Department of Education in South Australia, and I can imagine no better work for constant reference and reliable data. It is indeed a stupendous work, comprising the essentials of an encyclopedia of general information with the requirements of a dictionary.

Similar testimonials have been given by many other prominent statesmen and scholars at home and abroad.

American Authors.

William Dean Howells. The International surpasses all its predecessors. I am sure that I shall only have greater reason for my faith in it as you go on to that final Universal Edition which shall represent the prevalence of the English language and the American spelling throughout the world.

Thomas Bailey Aldrich. The professional man, whatever other dictionaries he may have at hand, will work at a serious disadvantage if he lacks this volume among his tools. I do not think that so various and valuable a mass of material has ever before been brought within the compass of a single volume.

Edmund Clarence Stedman. I take pleasure in testifying that it is a storehouse of linguistic wealth. The main text seems to me remarkably free from errors of fact or typography, and I have pretty well tested the accuracy of the chief tables and vocabularies in the appendix.

Rev. Moses Coit Tyler, LL.D., L.H.D. I speak quite within bounds when I testify that I find it a marvel of exact and vast information, of clear analysis, order, condensation, neatness of form and catholicity of judgment. It is to me a daily and hourly benefaction.

Mrs. Amelia E. Barr. It is a perfect book of its kind, a complete reference library in one volume, clearly arranged, very comfortable to handle. In every respect, for the student and the family, it is all that can be desired.

John Fiske. I have taken time to examine Webster's International Dictionary thoroughly, have fallen into the habit of consulting it almost daily and I assure you that I should hardly know how to get along without it.

Similar testimonials have been given by nearly all of the prominent American authors.

Representative Publications.

The Tribune, *New York.* It is a triumph of practical and scientific methods.

Times-Herald, *Chicago.* Webster's International Dictionary in its present form is absolute authority on everything pertaining to our language in the way of orthography, orthoepy, etymology, and definition.

The Constitution, *Atlanta.* A new and improved edition — improved and enlarged in every quality which goes to make up a perfect dictionary.

The Critic, *New York.* Webster's International Dictionary is a remarkable exemplification of scholarship, progressiveness, practical common sense, aptitude to feel for and help the masses in their gropings after information, along with a high standard and great accuracy of statement and definition.

Journal of Education, *Boston.* We advise every teacher to see that it has an honored place in every schoolroom, as an indispensable auxiliary to a good school.

The Globe, *Toronto.* This dictionary is the best book of its kind in the English language. For every family, the members of which have mastered the art of reading, its purchase will prove a profitable investment.

St. James's Gazette, *London.* We recommend the new Webster to every man of business, every father of a family, every teacher—to everybody, in fact, who is likely to be posed at an unfamiliar or half understood word or phrase.

The Argus, *Melbourne, Australia.* It contains all the information that is required in a dictionary. One of the most generally useful books of reference to be found in the English language.

Similar expressions have been received by the publishers from about all of the leading publications in this and many of the foreign countries.

Webster's International Dictionary

Is a complete and thorough revision of the well-known Unabridged, the purpose of which has been not display nor the provision of material for boastful and showy advertisement, but the due, judicious, scholarly, thorough perfecting of a work which in all stages of its growth has obtained in an equal degree the favor and confidence of scholars and the general public.

It excels in the ease with which the eye finds the word sought; in accuracy of definition; in effective methods of indicating pronunciation; in terse and comprehensive statements of facts and in practical use as a working dictionary.

The same characteristics belong to the abridgments of the International, their names and relation, in order of size, being as follows:

II. Collegiate.	V. High School.
III. Countinghouse.	VI. Common School.
IV. Academic.	VII. Primary School.

Each being distinguishable by a circular trade-mark on the front cover, showing its name, as in the case of the International below.

☞ All so-called Webster's Dictionaries **not having** our name on the title-pages are either cheap reprints of an obsolete book (the Unabridged of 1847), or are unauthorized and unreliable issues of a smaller book.
